Course Duration: 7 Hours

Certified Professional Ethical Hacker

About the course:

While hacking is illegal, ethical hacking isn't. It is crucial to understand that ethical hacking is very different from malicious hacking. Ethical hacking is done as a precautionary measure performed by companies against hackers with malicious intents. An ethical hacker is supposed to penetrate in the system to find any weak

ends that can be potentially exploited by a hacker who wants to get access to files or the system. So anyone penetrating into a system with permission to check any vulnerability is an ethical hacker. In this course you will learn all about potential vulnerabilities, how different viruses or malware softwares work. This is an advanced level course and will help you to prepare for the the C)PEH - Certification Exam exam as well.

An average Certified Ethical Hacker earns upto **\$99,000** annually.

Aims:

- You will learn all about ethical hacking and how to penetrate and detect any vulnerabilities in the system
- You will also learn how to report your findings
- This course helps you in preparation of the C)PEH - Certification Exam exam as well

Audience:

- Anyone who is a security officer
