Practice Exam - AWS Solution Architect Associate

This course is for professionals planning to enroll in the SAA-C01 Exam leading to the SAA-C01 Certification. The official exam voucher is not included in this course. However, the official exam voucher can be purchased separately on request.

About this Course:

This is an intermediate-level practice exam designed for professionals striving for success in the AWS Solution Architect Certification Exams. This practice exams follow the official Amazon Solution Architect Certification Exam Style & Pattern and cover the topics which will be included in the official exam.

Professionals will develop a real-time understanding of attempting the AWS Solution Architect Certification Exam and will be able to identify weaknesses and work on flaws before the official exam. This practice exam encompasses 80 questions and covers the most important topics and concepts of the AWS Solution Architect Certification.

Course Objectives:

The core objective of this course is to help professionals develop a better understanding and sound knowledge of the following key concepts of AWS Solution Architect Certification Exam:

- Identity Access Management (IAM)
- EC2 Instances and Computing
- EBS and S2 Storages
- Virtual Private Cloud (VPC)
- Databases such as RDS
- Elastic Load Balancers and AutoScaling
- Simple Queue Service (SQS)

This practice exam covers the abovementioned topics and simulates the style which will be followed in the official exam. The questions of this practice exam align perfectly with the guidelines provided by the Amazon for the Solution Architect Associate Exam.

Audience:

This course is specifically tailored for the following group of professionals and interested candidates:

- Solution Architects
- Cloud Computing Enthusiasts

Prerequisites:

Professionals planning to enroll in the Practice Exam - AWS Solution Architect Associate course must comply with the following prerequisites:

- Conceptual Understanding of Cloud Computing

Course Outline:

Topics covered in this exam are:

- IAM
- Compute (EC2 instances)
- Storage (S3, EBS)
- Virtual Private Cloud (VPC)
- Databases (RDS)
- AutoScaling
- Elastic Load Balancer
- Simple Queue Service (SQS) and more.

It simulates same style that is presented in the actual exam given by Amazon for SA Associate Exam.
