Course Duration: 15 Hours

Managing Messaging High Availability and Disaster Recovery (MS-200.3)

This course is for professionals planning to enroll in the MS-200 Exam leading to the MS-200 Certification. The official exam voucher is not included in this course. However, the official exam voucher can be purchased separately on request.

About this Course:

This course is included in a Microsoft 365 Messaging Administrator Course Series and is designed specifically to help professionals successfully clear the MS-200 Exam and achieve MS-200 Certification.

This course provides IT Professionals and System Administrators conceptual knowledge and understanding of High Availability Messaging & Disaster Recovery. Both the traditional and contemporary messaging accessibility and data restoration solutions are discussed in this course. With the development of information technology, newer advanced features are being integrated into messaging solutions and accessibility & disaster recovery continues to become more and more important.

Through this course, professionals will learn about effective ways to implement disaster recovery and accessibility solutions. The key concepts of modernized disaster recovery features such as continuous retention and replication are also discussed in this course. Students will also gain practical knowledge of integrating modern solutions into message databases and messaging systems. Upon completion of this course, professionals can learn the art of deploying advanced messaging infrastructure in Microsoft 365-based business enterprises.

Course Objectives:

The core objective of this course is to help professionals gain a better knowledge and sound understanding of the following key concepts:
