Difficulty: Advanced

Course Duration: 30 Min

Practice Exam - CAS-003: CompTIA Advanced Security Practitioner (CASP+)

About this Exam:

This test is planned for specialists and not managers at the proficient level in cybersecurity skills. Although cybersecurity administrators help find what cybersecurity measures and mechanisms could be put in place, trained CASP+

practitioners find out how to create solutions within these strategies and frameworks.

Targeted Audience:

This test is directed at such an IT specialist with the practical skills and knowledge needed to develop, design and engineer safe solutions through complex business settings. Participants seeking CASP certification must have a at least of Ten years of experience, including minimum five years of practical technical security experience.

Prerequisites:

Although there are no specific requirements, CompTIA plans to use CASP certification as an add-on to CompTIA Security+ certification or similar professional experience.

Certifications:

CASP+ certification.

Recommended Prerequisite Courses:

- CompTIA Security+
- CompTIA A+
- CompTIA Network+
