Course Duration: 1 Hour

Illustrator CS6 Advanced

This course will focus primarily on developing candidate understanding related to the more complex and advanced features of Adobe Illustrator CS6. Undertaking this course can improve your chances of becoming a sought-after graphic designer greatly as the Illustrator is the preferred software in the industry for creating all design based documents and entities like business cards, websites, logos etc.

About this course:

Adobe Systems developed the Adobe Illustrator and is also responsible for marketing it. This vector graphics editor software is the most preferred software in its genre and gauging its popularity in the industry, Adobe recently released its latest version i.e. the Illustrator CC 2018.

This course will revolve around the ways in which you can utilize the more complex features of this highly sought after graphics software. Once you have completed this course, you will be able to design high level graphics related to websites, logos, brochures etc.

Every single major feature of the Adobe Illustrator will be covered in detail in this course. Moreover, this course will also enable you to understand the ways in which difficult tasks can be done using this software like matching colors or creating advanced level effects.

While beginners can also take this course, it's imperative that candidates have working experience with the software so that they can fully grasp the complex features of Adobe Illustrator explored in this advanced level course.

A Graphic Designer can expect to earn around $48, 256 per annum.
