Difficulty: Intermediate

Course Duration: 2 Days

# **AppDynamics (APPDYN)**

#### About this course:

This course covers a comprehensive topic list covering the keys aspects of AppDynamics deployment and use. You will discover faster, more efficient monitoring with an enterprise Application Performance Management (APM) solution that learns your apps. By understanding end-user monitoring, you can create

superior experiences by monitoring where customers are connecting with your business the most. The topic of Infrastructure visibility allows you to monitor the servers and databases criticial to supporting application performance. By the end of the course, you will be able to successfully deploy and use AppDynamics.

## **Course Objective:**

- · AppDynamics concepts and use
- Monitor Application
- Analyze End-User Monitoring
- Use Server Monitoring
- Understand Application Analytics

# Audience:

Individuals interested in application performance

# **Prerequisite:**

Familiarity with applications in the enterprise.

#### **Course Outline:**

## Module 1. AppDynamics Essentials

Getting Started
AppDynamics Concepts
Using the Controller UI
Metrics and Graphs
Monitor Infrastructure
Custom Dashboards and Reports

#### **Module 2. Application Monitoring**

Model the Application Environment Business Applications Business Transactions APM for Python, Java and .NET Applications APM for PHP and Node.js Applications APM for Apache Web Servers

#### Module 3. End-User Monitoring

Browser Real User Monitoring Browser Synthetic Monitoring Mobile Real User Monitoring

#### **Module 4. Server Monitoring**

Enable Server Monitoring Monitor Your Servers Using Server Monitoring Configure Server Monitoring Configure Machine Health Rules, Policies, and Alerts

#### **Module 5. Application Analytics**

Deployment Options and Scenarios Installing Agent-Side Components Remote Analytics Agent Sizing Configuring Application Analytics

#### Labs

Lab 1: Introduction AppDynamics GUI

Lab 2: Monitoring and Modeling Application

Lab 3: End-User Monitoring

Lab 4: Server Monitoring

Lab 5: Application Analytics

# **Credly Badge:**

# Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
