Citrix App Layering and WEM Administration (CWS-314)

About this Course:

Designed for experienced IT professionals, you will learn to build and combine App Layers to optimize management of your app and desktop images and to implement Workspace Environment Management to improve log-on times, centralize user settings management, and optimize the performance of machines. You will leave this course with a good understanding of how to manage more complex solutions and features in your Citrix Virtual Apps and Desktop 7 site.

Course Objectives:

- Configure Workspace Environment Management to improve the end user environment and virtual resource consumption
- Implement App Layering skills, for example how to create and administer

- OS, platform, application, elastic and user layers
- Migrate to Workspace Environment Management

Audience:

- Built for experienced IT Professionals familiar with Citrix Virtual Apps and Desktops 7 in an on-premises environment or Citrix Cloud looking to expand their Citrix Virtual Apps and Desktops skills to an advanced level. Potential students include administrators or engineers responsible for the Citrix Apps and Desktop 7 Site.

Prerequisites:

- Strong foundational knowledge of Citrix Virtual Apps and Desktops 7.
