**Course Duration:**

## DevOps for Network Engineers (LFS266)

This course will teach you how to integrate into a DevOps/Agile environment, commonly used DevOps tools, how DevOps teams collaborate on projects, how to confidently work with software and configuration files in version control, how to recognize the roles of SCRUM team members, how to confidently apply Agile principles in an organization, and more.

## Course Outline:

Chapter 1. Course Introduction

Chapter 2. Modern Project Management

Chapter 3. The DevOps Process: A Network Engineer's Perspective

Chapter 4. Network Simulation and Testing with Mininet

Chapter 5. OpenFlow and ONOS

Chapter 6. Infrastructure as Code (Ansible Basics)

Chapter 7. Version Control (Git)

Chapter 8. Continuous Integration and Continuous Delivery (Jenkins)

Chapter 9. Using Gerrit in DevOps

Chapter 10. Jenkins, Gerrit and Code Review for DevOps

Chapter 11. The DevOps Process and Tools (Review)

## Credly Badge:

### Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
