**Course Duration:**

## Node.js Services Development (LFW212)

### About this Course:

This course provides a deep dive into Node core HTTP clients and servers, web servers, RESTful services and web security essentials. With a major focus on Node.js services and security this content is an essential counterpart to the Node.js Application Development (LFW211) course, and will prepare you for the OpenJS

## Course Objectives:

In this course, students will learn how to create web servers and leverage ecosystem frameworks for rapid composability. Students will also learn how HTTP works at a Node core API level, what the essential RESTful practices are, and what is needed to implement RESTful services. Finally, they will develop skills needed for server and service composition. After completing this course, students will be able to build RESTful JSON services that are secure and straightforward to maintain. These skills will prepare students for some of the most common Node.js roles in the industry today. The course also prepares you to take the OpenJS Node.js Services Developer certification

## Audience:

This course is designed for developers on their way to senior level who wish to master and demonstrate their Node.js knowledge and skills, in particular how to use Node with frameworks to rapidly and securely compose servers and services. Before enrolling, students should know how to use a command line terminal, and be familiar with JavaScript as well as knowledge domains of the OpenJS Node.js Application Developer (JSNAD) program

## Prerequisites:

Before taking this course, you should be familiar with:

- Command line terminal
- JavaScript
- Knowledge domains of JSNAD

## Course Outline:

Chapter 1. Course Introduction

Chapter 2. Setting Up

Chapter 3. Creating a Web Server

Chapter 4. Serving Web Content

Chapter 5. Creating RESTful JSON Services

Chapter 6. Manipulating Data with RESTful Services

Chapter 7. Consuming and Aggregating Services

Chapter 8. Proxying HTTP Requests

Chapter 9. Web Security: Handling User Input

Chapter 10. Web Security: Mitigating Attacks

## Credly Badge:

### **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
