Course Duration: 7 Hours

Introduction to HTML and CSS

About this Course:

The only way to effectively learn HTML and CSS is by diving right in and building websites from the ground up. That is exactly what this course does. Designed for complete beginners, you will create a complete website section by section.

When it comes to the world of technology, staying ahead of the curve is always a challenge. In the last year one aspect of this the world wide web has kicked up a gear with the introduction of HTML, the newest version of the code that makes the web tick. If you learn HTML along with CSS (the next level of web design used on all modern websites), you will have a recipe for success and this course will show you how. Build Like a Pro with HMTL and CSS Design. You will start by becoming familiar with HTML tags and how they are used, followed by the use of attributes and common settings. Once you have got a handle on basic HTML, you'll move on to the fun stuff: CSS. You'll use CSS for fonts, colors, lists, navigation menus, and more, adding a new element to your website with each section. Links, layouts, tables, forms and videos are all covered too. If you know how to use a web browser and a text editor, you're all set up for this course already. No extra software or tools are needed, and you can choose your preferred option of each to get going. By the time you finish, you'll know everything you need to know to create beautiful, functional, easy to use websites of any kind.

Prerequisites:

Students only need to know how to use a browser and a text editor. It is up to the student to choose one of each - there are many free options available.

Audience:

Anyone who wants to learn html & CSS from scratch

Course Outline:

- Course Introduction
